Project №1090
Production of dried fruits and dried vegetables

Project description It is planned to produce dried fruits and dried vegetables with further export. The author of the project has European technologies and equipment that meet the high European requirements for the production of dried fruits and dried vegetables. The author of the project has extensive experience in this field. The author of the project invested **$ 3 150 000** for the purchase of European equipment for production, as well as **$ 600 000** for the construction of buildings. Due to the lack of working capital, additional investment is needed.

Required investment amount: $ 600 000, of which:

Name	Amount, $
For the purchase of raw materials and preparation before the sales season	600 000
TOTAL:	**600 000**

Income data for the year:

Within **6 months**, the procurement will be carried out and the sale of products will begin in October. During the procurement period, agreements with buyers will be drawn up

Name	Quantity, ton	Price per 1 ton, $	Amount, $
Finished products (dried fruits and dried vegetables)	1 080	3 500	3 780 000
TOTAL:			**3 780 000**

Annual expenditure data:

Name	Amount, $
Raw materials for production	600 000
Employee salaries, utility bills, and other expenses	810 000
Taxes, logistics and marketing	600 000
TOTAL:	**2 010 000**

- **Annual income: 3 780 000$**
- **Annual expenses of: 2 010 000$**
- **Net profit per year** : 3 780 000$-2 010 000$ = **1 770 000$**
- **Profitability of investment capital:**

ROI $= \frac{\text{Net profit}}{\text{Investment amount}} \times \text{Investor's Share} * \mathbf{100\%}$ **= 118%**

Distribution of shares:

At the beginning, the investment amount of **$ 600,000** will be paid, and the remaining net profit will be distributed by **40%** - the investor and **60%** - the author of the project
